

MEMORANDUM FOR: Director of Central Intelligence

25X1 FROM:
Executive Director

25X1 SUBJECT: Production Enhancement Program for FY 1985

1. I am forwarding six proposals for consideration as part of the DCI Production Enhancement Program for FY 1985. We believe that these proposals, which are listed below in priority order, would significantly enhance the quality of intelligence exploitation and analysis, and that they warrant favorable consideration for inclusion in the DCI's 1985 Program.

25X1

2. A common feature of the above proposals is the attempt to exploit new ADP techniques to improve analytic effectiveness and efficiency. Some of these initiatives will take advantage of recent work in artificial intelligence to develop software for automated systems that can screen large volumes of material, perform routine functions and provide other computerized support to free analysts to work on complex intelligence issues and questions that cannot be answered by machines. Although such development efforts are risky, their potential value to Community analytic efforts is very high and well worth the investment.

25X1 3. I will be happy to provide any further information you might need in considering these proposals.
